Electors of the 15th District:

Are you fully aware of the important duties tion? We have always considered our District safe without the exercise of any extraordinary effort, and though there can be no doubt of the election of our excellent nominee, the present year, the crisis calls for unusual exertion .shall it be said that the unconquered 15th has faltered in its duty, at the moment that the giad tidings of victory shall come to our ears from all other parts of the State? Will you suffer it to be said that a combination shall triumph over one who has proved himself every way qualified to receive your undivided support to gratify the personal malignity of the man who has sought by this means to overthrow a rival? We know you will not and that through your united and vigorous efforts on Monday next, we shall proudly half our esteemed nomince, the Senator from this veteran District.

The arrival of the schooner Home, at N. O., has brought advices from Tampico, to the morning of the 7th. All the troops intended for the South have left Tampico-a force of out 2000 being left to garrison that place.

The arrival brings abundant reports concerning the alledged battle between Gen. The Picayine's correspondent, Mr. Kendal, says that these rumors had reached there and were not credited, most regarding them as intending to cover Santa Anna's designs upon other points. THE Manufacturers of GOODYEAR'S METALIC GUM ELASTIC MACHINE BELT-ING, made only at Roxbury, Mass., believe that they can now furnish the article of such quality as to render it of immense importance to all consumers of MACHINE BELTING.

The favorable opinion expressed, thus far, by those who have used it, has induced the manufacturers to make arrangements to supply it in unlimited quantities, and to make such reduction in the prices as the cost of the raw material will warrant. It is composed of several thicknesses of the very best Duck, and Goodyear's Metalic Gum Elustic CONSOLIDATED. Its peculiar qualities are—

1. Perfect equality of width and thickness, which it will retain, No degree of heat under 250 l'arenheit injures it, and it remains fiexible in any degree et

3. Essential and common oils, terpentine and other solvents, (some of which at once will detroy leather.) produce no effect on it. 4 It is of great strength and duribility; Does NOT SLIP ON THE PULLEYS, consequently

gain of power is obtained; and, when adjusted to machinery, does not require alterations, as is the case with leather. 5, it is particularly adapted to Machine Shops, Furnaces, etc., where coal, gas, and steam

prove so injurious thleather. 6 It is confidently believed that Electricity will in a great measure be avoided by the use of this Falting, it being a non-conductor, which has been ascertained by some of the most experi eaced and scientific cotton manufactures in New England.
